DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-28 and 58-81**, drawn to a control station for two-way satellite communication and a method for controlling a return channel from a control station, classified in class 370, subclass 319 (Multiple access).
 - II. Claims **29-57 and 82-102**, drawn to a transceiver and a method for transmitting a frame-synchronized message, classified in class 370, subclass 350 (Synchronization).
 - III. Claims **103-141**, drawn to a communication system and a method for balancing traffic loads on a plurality of return channels, classified in class 370, subclass 468 (Assignment of variable bandwidth or time period for transmission or reception).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as channel allocation in multiple access systems. Invention II has separate utility such as in frame synchronization. Invention III has separate utility such as assignment of variable bandwidth for load balancing. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for one of Groups I, II, or III is not required for the search of the other groups, restriction for examination purposes as indicated is proper.

4. A telephone call was made to John T. Whelan on 03/26/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Moore, Jr. whose telephone number is (703) 305-8703. The examiner can normally be reached on Monday-Friday (8:30am - 5:00pm).
